

As a loyal XM radio subscriber and listener, I respectfully urge you to reject NAB's petition 04-160. NAB does not have the right to try to decide what my subscription to XM radio is. If XM wants to offer its subscribers local traffic and weather, it is their right. This is a country of choice and whether XM radio offers local traffic and weather, people still have the choice to listen to AM, FM, XM, or Sirius. People are not going to totally stop using AM and FM radio just because XM is deciding to offer services that it's customers want. Just like Local television isn't going to stop broadcasting because Cable Television Stations like HBO and Showtime do not have commercials. There are things that XM radio offers that you may not be able to find locally, and on the other hand Local radio stations offer services that XM will never be able to offer, which is why people will not choose one over the other but will use both together. Please reject 04-160. It is XM radio's right to provide its customers with great service! Thanks
